# VERIFICATION

## Do you want future generations to see the 4 seasons?

The most important environmental problem of today is climate change resulting from global warming. Climate change causes seasons to become more variable and unpredictable, frequent and severe natural disasters (hurricanes, floods, droughts), rising sea levels, melting glaciers, changing ecosystems, and affecting agriculture and water resources. These effects can cause economic, ecological and social problems. For this reason, sustainability and combating climate change have become a worldwide priority and organizations have begun to focus more on their environmental responsibilities. We are here to support your environmental responsibilities and environmental commitments and contribute to your environmental sustainability. Because we all have a responsibility to create a cleaner, greener and more sustainable world for future generations...

We provide accredited verification services with our TURKAK accreditation for verifications within the scope of national legislation and our Eurocert representation for verifications within the scope of ISO 14064-1.

Verifying corporate carbon footprints contributes to environmental protection efforts at a personal, corporate and societal level and is an important step towards a more sustainable future.

Verifying the water footprint helps us use water more sustainably and effectively, understanding and reducing water use and waste.

Verifying the product carbon footprint raises awareness about reducing carbon emissions and environmental responsibility, while also contributing to the development of more sustainable products.

Verification of greenhouse gas emissions within the scope of national legislation helps determine the right strategies for our country to achieve its greenhouse gas emission reduction targets.

# SYSTEM CERTIFICATION

# AGRICULTURAL PRODUCT CERTIFICATION

## Are You Ready to Shape the Agricultural Production of the Future with Sustainable Agriculture Techniques?

The importance of creating and implementing sustainable agricultural systems based on protecting human health and natural resources in order to solve the environmental impacts and health problems arising from traditional agricultural methods is increasing day by day.

Sustainable agriculture refers to a socially livable, economically profitable and efficient agricultural production model that can meet the nutritional needs of today and future generations, supports the flow of natural life; In this context, it enables the protection of natural resources and wildlife, safe food supply and economic development with a production approach that offers ecological, economic and social benefits.

Ürün  
TS EN ISO/IEC 17065  
AB-0010-U

CTR provides comprehensive services for the control and certification of sustainable agricultural production programs that are widely implemented in our country and around the world, with the direct authority it receives from the program owner institutions/organizations and TÜRKAK accreditation.

## ORGANIC AGRICULTURE

It is an agricultural production technique performed without the use of synthetic chemicals. Different countries seek certification for cross-border organic food trade in line with their organic programs.

CTR provides the necessary certification services for international organic product trade. Additionally, CTR is a member of social community organizations that have authority in organic programs in our country and around the world.

### OUR SCOPE OF AUTHORITY

- Crop Production
- Livestock
- Aquaculture
- Processing, packaging, labeling, storage, transportation and marketing of organic products

It is a modern agricultural production program accepted all over the world that requires production in accordance with the agricultural legislation of the country where it is produced and consumed.

It is a modern agricultural production program preferred by many retail organizations in the country, supported by certified producers according to our country's legislation, and preferred by consumers.

CTR continues to be the choice and pioneer of the best all over our country since 2007, as the first control and certification organization authorized and accredited in all scopes of good agricultural practices.

# VOCATIONAL COMPETENCE CENTER

What should a personnel  
certification body have the most?

Credibility	Customer-Focused Process Management	Compliance with Legal Requirements
Qualified Personnel Structure	Infrastructure Suitable for Exams	Wide Range of Services

CTR Vocational Competence Center is here to provide services with a philosophy that will cover all of these. You can examine the professions within our scope and request guidance from our Planning Officers to find the most suitable certificate alternatives for you.

# HALAL CERTIFICATION

How can your business gain a competitive advantage with halal certification?

## A Broad Market

Products and services offered by halal certification are in great demand among Muslim communities. This means your business has broad market potential and can help you differentiate yourself from your competitors.

## Customer Trust

Products and services with halal certification are considered reliable for Muslim consumers. This contributes to increasing customer loyalty and strengthening brand loyalty.

## International Market Access

Halal certification is a standard that is also valid in international markets. When your business has halal certification, you can enter foreign markets and compete with ease.

## Ethical Values

Halal certification shows that your business complies with ethical values and hygiene standards. This increases your customers' trust in your business.

## Above-Competition Quality

The requirements of halal certification promote the high quality of your product and services. This increases customer satisfaction and puts you ahead of your competitors.

## Sustainability

The requirements of halal certification promote sustainable business practices. This shows your social responsibility towards future generations.

## Brand Recognition

Halal certified products and services increase awareness of your brand and build a positive reputation. This provides an advantage in attracting customers and being competitive.

Our organization offers auditing and certification services on halal food. CTR, one of the leading organizations that have adopted a reliable and fast service approach in this field, is one of the first organizations to be accredited by the Halal Accreditation Agency (HAK) for halal food certification.

# ADVISORY

## Construction Companies For Sale

In accordance with the Public Procurement Legislation, CTR Advisory continues its activities in the sale of construction companies, especially those with qualifications in work experience documents, and works to offer the most appropriate and reliable solution to its customers.
